Post Match Survey Responses

Did you review the list of programs to which you applied with a Specialty Advisor?

Yes 3
No 1

Before ranking programs, did you review your rank list with a Specialty Advisor?

Yes 1
No 3

If not a Specialty Advisor, with whom did you review your rank list?

Deans 1
Faculty 2
Partner/Spouse 1

Other: Please describe

Google
peers and family

Were you advised to do an away rotation by a specialty advisor?

Yes 0
No 3

Who was your most effective career advisor for your specialty? (number of multiple mentions)

Confidential advisor
Dr. Emily Webb
Dr. Kanade Shinkai

Sabrina Fernandez

Brad Monash (med-peds) a non-ucsf med-peds primary care practitioner

If you were to do anything differently in the residency application process, what would that be?

would have gotten a third opinion from another radiology advisor because I was reassured by the confidential and non-confidential specialty advisors that I would match at a top program / stay in CA but I ended up not matching

EMAIL the programs

I think I would have had more serious conversations with my career advisors/mentors about the possibility of not matching and next steps on how to proceed. I think I would have wanted to practice mock interviewing more. I think I would have wanted to spend more time on my application.

-send emails earlier to a select few programs advocating for myself to get an interview. I sent one email after a program rejected me and they were receptive to it but couldn't schedule me in at that point -Wish I had specifically reached out to residents at programs I was considering applying to while creating my program list or even just prior UCSF students who had applied med-peds

Please provide any other information that might be helpful to UCSF students who will apply to your specialty choice in the future

Radiology became much more competitive in 2022. Must work hard to get a high step score and radiology research.

Start Early

I think it would be important to let students know about the possibility of not matching earlier on in the application process. I think it would be important to connect students applying into dermatology with potential year-long research experiences earlier on in their career. I think it would be important to introduce students to dermatology earlier in their careers so that they can begin thinking about these steps.

-reach out earlier to prior UCSF med-peds folks -I went to both medicine and peds resident panels for applying 4th years and found them helpful -Don't be afraid to advocate for yourself especially if you have a strong interest in a particular program outside of california (which is even more likely for med-peds than other specialties given how few california programs there are). I wrote a special personal statement for the program I matched at where I added a short paragraph about why their mission in particular was a good fit for me.
