Who was your most effective career advisor for your specialty? (number of multiple mentions)

Genetics program director at UCSF
Solmaz Manuel was wonderful and so helpful!

If you were to do anything differently in the residency application process, what would that be?

Ask earlier about parental leave policy specifics (from all programs, not just my top 5)

Not interview at as many programs

Please provide any other information that might be helpful to UCSF students who will apply to your specialty choice in the future

They are all great and you'll definitely feel very wooed. Be careful about being too honest about plans for family, because sadly this may not be very welcome everywhere still.

Applying to multiple types of programs is often frowned upon, it seems, but I found it incredibly helpful and not much more difficult than if I hadn't.
